Draft Environmental Impact Statement - Lake Whatcom Landscape Plan

Summary

- Description of the Proposal**
- Objective of the Proposed Action**
- Need**
- Purpose**
- Relationship to Ongoing and Future Regulatory and Planning Efforts**
- Summary of the Draft EIS and Major Conclusions**

Introduction **p. 1**

- Purpose of the Environmental Impact Statement**
- The Department's Legal Obligations**
- The Board of Natural Resources**
- Lake Whatcom DNR Landscape Planning Committee**
- Lake Whatcom Landscape Planning Area: an Overview**
- Income from State Trust Lands in Lake Whatcom Landscape Planning Area**

Description of the Proposal and Alternatives **p. 3**

- Objectives, Location and Description of the Planning Process**
- Description of the Alternatives**

- No Action Alternative**
 - Preferred Alternative**
 - Alternative 3**

Summary and Comparison of Alternatives

Review of the Affected Environment, Potentially Significant Environmental Impacts, and Mitigation Measures for the Proposed Alternatives **p. 43**

Affected Environment – Existing Conditions

Natural Environment

- Earth
- Air
- Water
- Plants and Animals
- Energy and Natural Resources

Built Environment

- Environmental Health
- Land and Shoreline Use
- Transportation
- Public Services and Utilities

No Action Alternative (PDEIS Alternative 1)

p. 76

Natural Environment

Earth
Air
Water
Plants and Animals
Energy and Natural Resources

Built Environment

Environmental Health
Land and Shoreline Use
Transportation
Public Services and Utilities

Preferred Alternative

p. 105

Natural Environment

Earth
Air
Water
Plants and Animals
Energy and Natural Resources

Built Environment

Environmental Health
Land and Shoreline Use
Transportation
Public Services and Utilities

Alternative 3

p. 125

Natural Environment

Earth
Air
Water
Plants and Animals
Energy and Natural Resources

Built Environment

Environmental Health
Land and Shoreline Use
Transportation
Public Services and Utilities

Appendices

- A Acknowledgements**
- B Distribution List**
- C Engrossed Second Substitute Senate Bill 6731**
- D Updated Assessment Information**
- E Commissioner Correspondence**

Maps, Tables, and Figures

Maps

- DEIS 1:** No Action Alternative
- DEIS 2:** Preferred Alternative
- DEIS 3:** Alternative 3

Tables

- Table 1:** Trust Acreages in the Lake Whatcom Area
- Table 2:** Comparison of Riparian Protection through Buffers
- Table 3:** Type 5 Stream Protection
- Table 4:** Slope Stability and Mass Wasting
- Table 5:** Acres which would require special consideration in planning to avoid or mitigate impacts to cultural resources from forest management activities
- Table 6:** Cumulative Impacts on Timber Harvest
- Table 7:** Summary of projected undiscounted revenues for the Lake Whatcom landscape planning unit.
- Table 8:** Hydrologic maturity thresholds for Hydrologic Analysis Units within the Lake Whatcom watershed.
- Table 9:** Area-based revenue distribution ratios used to apportion revenues from the Lake Whatcom landscape planning area to the state general fund, trust beneficiaries, junior taxing districts and land management accounts
- Table 10:** Estimated average annual harvest revenues for the No Action Alternative in the Lake Whatcom landscape planning area and average annual revenue change relative to the No Action Alternative, by beneficiary group for the first two decades and the entire modeled planning period (200 years)
- Table 11:** Estimated average annual harvest revenues for the Preferred Alternative and average annual revenue change relative to the No Action Alternative, by beneficiary group, for the first two decades and the entire modeled planning period (200 years)
- Table 12:** Estimated average harvest revenues for Alternative 3 and average annual revenue change relative to the No Action Alternative, by beneficiary group, for the first two decades and the entire modeled planning period (200 years)

Figures

- Figure 1:** Upland Land Use/Ownership Pattern
- Figure 2:** Specially Protected Acres / Harvestable Acres
- Figure 3:** Specially Protected Acres / Projected Revenue
- Figure 4:** Recovery of hydrologic maturity with stand age by 50-year site index
- Figure 5:** Proportion of area on which timber harvest is constrained by management alternatives by trust
